

# Tim McVeigh is Still Alive!

Lorraine Day, M.D.

Tim McVeigh was supposedly executed by lethal injection after he was found guilty of the Oklahoma bombing. He was just another one of those disenchanting “lone bombers” (like “lone gunman”) who just wanted to blow up a lot of people, or so the press would have you believe. They suggested that he was upset with the government over the Waco disaster, so detonated a fertilizer bomb that destroyed most of the Murrah Building and killed over a hundred innocent people, including many children.

We won't go into the extensive evidence showing that Tim McVeigh did not blow up the building, and I'll show who really did it. One clue: Osama bin Laden and the Arabs had NOTHING to do with it. The evidence is in many places on the internet, and eventually I will write about it on my website. But it takes time to write these extensive exposes.

Right now we'll just look at the facts of Tim McVeigh's supposed execution.

As a physician, keeping close watch on the commercial news, I KNEW for a fact, they had no intention of executing Tim McVeigh, for reasons I will soon disclose.

Tim McVeigh was not a disgruntled member of some rag-tag militia. He worked for the CIA. But this was a false flag operation, meaning a purposeful disaster planned against a government's own citizens, in this case the U.S. government against U.S. citizens, to frighten the people, to get them to surrender their rights willingly, and to further the government's goals of increased control. Primarily, it was done by the U.S. Government in order to get the Anti-Terrorist legislation passed – which, indeed, DID happen within weeks of the Oklahoma bombing.

In America, these False Flag operations have happened many times in the past, most notably at Pearl Harbor. The goal of the government at that time was to frighten the people enough to make them willing to go to war and die, or to be willing to send their sons to war to die, but NOT for freedom, but instead, to further the aims of the One World Government run by the Illuminati/Zionist Jews. Those terms will soon be defined on my website home page.

Back to Time McVeigh's supposed execution.

1. After a prisoner is sentenced to death, he has many chances for appeal and they virtually all take them, anxious to stay alive at any cost. Yet Tim McVeigh asked for his execution date to be moved up. That is almost unheard of.

2. While in prison, Tim McVeigh was visited numerous times, apparently 18 times, by a psychiatrist named Dr. Louis Jollyon West, often referred to as Dr. Jolly West. Dr. West was the chairman of the department of Psychiatry at UCLA, but his real job was as a CIA asset, in charge of the MK Ultra Mind Control program.

Dr. West had also paid visits to Sirhan Sirhan, another supposed lone gunman, accused of killing Robert Kennedy, but in reality a product of the CIA mind control program, set up as the patsy.

Dr. West was also the psychiatrist employed by the government to evaluate the "mental condition" of Jack Ruby after he shot Lee Harvey Oswald. You may not know that when Ruby was interrogated, he told the FBI that there was a huge conspiracy surrounding the JFK assassination and he could only expose it if they moved him to a safe place – which they refused to do.

Naturally, the government, who was involved in the assassination of President John F. Kennedy through the Zionist Jewish controlled CIA and the Zionist Jewish controlled mafia, wanted Ruby to be declared mentally ill to debunk his talk of conspiracy. Dr. West was happy

to comply with the diagnosis of mental illness for Jack Ruby.

3. Before Tim McVeigh's scheduled execution, the state announced that none of his organs would be donated after his execution. This is very strange. A state OWNS the body of an executed prisoner, and can receive \$200,000 or more for the body parts of a young healthy specimen like McVeigh.

4. Before his execution, the state announced that Tim McVeigh's medical records would be sealed for 25 years. The question is, Why?

5. Tim McVeigh's lawyers petitioned a judge to rule that no autopsy would be done on his body after his execution, a highly unusual request.

6. The IV that was supposed to deliver the lethal injection dose to Tim McVeigh was placed, of all places, **in his leg!** I knew right then that they were NOT going to execute him. This was a fake execution, to pacify the families of the victims involved in the bombing disaster.

The public doesn't understand what every surgeon and anesthesiologist knows very well. There is no large vein close enough to the skin surface in the leg to place a large enough needle or catheter to deliver the proper dose that would reach the vital organs fast enough to kill a person cleanly. It would be a mess.

IVs are placed in the arm, the hand, occasionally in the foot (but not in the foot for extensive or difficult procedures) and certainly not in the foot or leg for an execution. If an IV cannot be placed in one of these upper extremity locations because of previous injury with scarring, or some other reason, then a small incision is made in the area near the clavicle to gain access to a large vein going directly to the heart.

7. One of the witnesses at Tim McVeigh's supposed execution was Susan Carlson, a reporter for WLS-AM Radio in Chicago. She stated on the air that McVeigh "appeared to be still breathing or what appeared to be shallow breathing, even after being pronounced

dead, and his eyes remained open.” (Susan Carlson was a friend of Chandra Levy according to the American Free Press, Nov 6, 2010, p 4.)

There were ten media people present and no one contradicted her. But the mass media in Chicago, including apparently her own radio station, immediately suppressed her story.

In case ANYONE doesn't know this, when a person is DEAD, he does NOT continue to breathe – even to breathe “shallowly.” When a person is DEAD, he doesn't breathe AT ALL!

Why would the government go to such great lengths to DECEIVE the public with a FAKE execution?

First of all, Tim McVeigh is a valuable asset for the CIA, particularly if he is under mind control, an almost certainty because of his many visits from Dr. “Jolly” West. They've invested much time and money in his programming and he performed well – he kept his mouth shut (unlike Lee Harvey Oswald who declared for the TV cameras when he was arrested, “I didn't do it. I've been made a patsy!”). A little plastic surgery, a name change, and Tim McVeigh will be off on another CIA project.

And as I stated earlier, the government wanted closure to this event – the Oklahoma Bombing, to get it off the front pages, to satisfy the families of the victims that the “guilty” one was now dead, and to attempt to put a stop to the investigation of the truth by many on the internet who have exposed the government's involvement. The CIA particularly, wanted to put this whole matter to rest – permanently.

But that will never happen until the full truth has been brought to light.

One other interesting twist to this story. The person who was involved in choosing the people who would observe Tim McVeigh's execution was none other than Chandra Levy, the young intern in the Bureau of Prisons who had an ongoing affair with a married California Congressman, Gary Condit.

But Chandra Levy would not live to see McVeigh's execution. She was murdered before his execution took place.

Why would someone at the low level of an intern be involved in such an important mission as this? Well, it turns out that Chandra Levy was not so “low-level” after all. Apparently she was working with the Israeli Mossad and had computer access to a significant amount of rather high-level sensitive information in the Bureau of Prisons and other governmental areas.

Maybe she learned “too much” and had to be eliminated by the Mossad! Then, as in any “good” False Flag operation, apparently they tried to set up Gary Condit as the “fall guy.”

Tim McVeigh’s first execution date was set for May 16, 2001 but was postponed until June 11, 2001. Chandra Levy disappeared from her home sometime between May 1 and May 9, 2001, a time when she had planned to go back to California to receive her graduate degree. But there is evidence that she turned up briefly in Israel during that time, right before she permanently “disappeared.”

On May 22, 2002, her skeletal remains were found in Washington’s Rock Creek Park where a year earlier, shortly after her disappearance, a massive police search had produced **no** results.

Could her disappearance and murder have been a result of her inside knowledge about McVeigh’s coming fake execution? Or had she been caught snooping in unauthorized computer areas where she may have had access to inside information on the coming 9/11 World Trade Center False Flag operation?

## **More on Chandra Levy**

An article about Chandra Levy has appeared in the November 6, 2010 issue of the American Free Press (page 4) confirming that Chandra was a “honey pot,” the Israeli Mossad’s name for attractive female operatives.

“In an article entitled ‘What Really Happened to Chandra Levy,’ former Mossad agent James Besser commented on their insidious tactics. ‘Operation Dumb Eagle’ is the code name for the spy agency’s extensive efforts to infiltrate top levels of the U.S. government through the placement of American Jews in sensitive positions. Part of Operation Dumb Eagle is the recruitment, training and placement of

attractive Jewish coeds as U.S. interns,” according to the American Free Press (AFP).

Miss Levy disappeared while jogging in Rock Creek Park in May 2001. Her skeletal remains were found one year later not far from where she was running, even though an exhaustive search of that area had been done shortly after her disappearance.

“What makes circumstances even more peculiar, the FBI’s primary detective assigned to examine Miss Levy’s disappearance was Special Agent Bradley Garrett. Not only did Garrett assist in the widespread cover-up of White House Deputy Counsel Vince Foster’s so-called “suicide” at Washington’s For Marcy Park, he also spearheaded an inept investigation into the murder of Capitol Hill intern Mary Mahoney.

Linda Zamsky, aunt and confidant of Chandra Levy, has stated publicly that Chandra had ‘something big and important to tell her.’ She died before she could reveal that secret to Zamsky.” Ibid.

## Murdered Intern Had ‘Something Important to Tell’

By Victor Thorn

Similar to Monica Lewinsky, did Chandra Levy potentially fill the role of a Mossad espionage seductress? Following her May 2001 disappearance, headlines inundated the public with titillating details of a deviant affair with Rep. Gary Condit (D-Calif.).

Eight years after her dead body was discovered in Washington, D.C.’s Rock Creek Park, the murder trial of Ingmar Guandique—a non-English speaking Salvadoran illegal immigrant—is set to begin.

However, questions arise as to whether Guandique or Condit had any involvement in this crime. Instead, Miss Levy’s political connections provide an abundance of other alternatives.

After interning for Los Angeles Mayor Richard Riordan and California Gov. Gray Davis, Miss Levy began a similar stint at the Federal Bureau of Prisons (BOP) in D.C.

With access to highly sensitive data in this position, Miss Levy became involved with Condit, who sat on the House Permanent Select Committee on Intelligence. Her influence also included a friendship with Republican strategist Karl Rove, while at the same time

Linda Zamsky, aunt and confidant of former Washington intern Chandra Levy, is shown arriving at the Levy residence in Modesto, Calif., in May 2002—just after the Levys received word the remains of their daughter had been found in a park in Washington, D.C. According to Zamsky, Chandra had “something big and important to tell her.” She died before she could reveal that secret to Zamsky.

Eagle is the recruitment, training and placement of attractive Jewish coeds as U.S. interns.”

Like Miss Lewinsky, Miss Levy was Jewish, with her family attending Beth Shalom Temple in California. In line with their faith, Miss Levy and her mother trav-

or what appeared to be shallow breathing. Even after being pronounced dead, his eyes remained open.”

Susan Carlson was friends with Miss Levy. Around this same time, Miss Levy disappeared while jogging in Rock Creek Park in May 2001. A year

securing a VIP seat for George W. Bush's 2001 inauguration.

For a woman in her early twenties, Miss Levy was perfectly positioned to be a "honey pot," or a "swallow," as the Mossad calls attractive female operatives.

In an article entitled "What Really Happened to Chandra Levy," former Mossad agent James Besser commented on their insidious tactics.

"Operation Dumb Eagle is the code name for the spy agency's extensive efforts to infiltrate top levels of the U.S. government through the placement of American Jews in sensitive positions. Part of Operation Dumb

**CHANDRA LEVY**

Did she know too much?

eled to Israel only two months prior to her disappearance. Upon returning, Miss Levy continued her duties at the BOP, where according to Besser's July 19, 2001 article, she "was involved in choosing the people who would observe Timothy McVeigh's execution."

Considering the well-chronicled role of the Southern Poverty Law Center, FBI, CIA and BATF operatives in the 1995 Oklahoma City bombing for which McVeigh was convicted as a co-conspirator, Condit told *Parade* magazine on Sept. 9, 2001 that Miss Levy exhibited an incredible interest in Middle East policy, terrorism and the McVeigh case.

Further, while interning at the BOP, Miss Levy would have been aware that psychiatrist Dr. Louis Jolyon West visited McVeigh at least 17 times. As a protégé of Jewish MK-ULTRA Director Sidney Gottlieb, West also diagnosed Jack Ruby as being "insane" and "paranoid," rather than possessing any conspiratorial knowledge about John F. Kennedy's 1963 assassination.

In addition, West visited Sirhan Sirhan in prison after he played the mind-controlled patsy in Robert F. Kennedy's 1968 murder.\* Oddly enough, McVeigh claimed to have been implanted with a microchip during his service in the first Gulf War.

After being convicted, along with Terry Nichols, for the still unsolved OKC bombing, McVeigh had originally been slated for execution on May 16, 2001. But after this date was rescheduled, Miss Levy prematurely and unexpectedly received her termination notice from BOP officials. Days later she went missing, but only after telling her aunt and confidante, Linda Zamsky, that she had "something big and important to tell her."

Less than two weeks later, McVeigh supposedly died from a lethal injection. Controversy has surrounded his death because eyewitness Susan Carlson of Chicago's WLS-AM reported, "He appeared to still be breathing,

later, after an exhaustive search, Miss Levy's skeletal remains turned up not far from where she was running.

And what makes circumstances even more peculiar, the FBI's primary detective assigned to examine Miss Levy's disappearance was Special Agent Bradley Garrett. Not only did Garrett assist in the widespread cover-up of White House Deputy Counsel Vince Foster's so-called "suicide" at Washington's Fort Marcy Park,\*\* he also spearheaded an inept investigation into the murder of Capitol Hill intern Mary Mahoney.

By all accounts, Mahoney boasted of writing a memoir that chronicled an array of White House "sex-capades." Shortly thereafter, as Douglas Herman wrote on Jan. 4, 2004, "Mary and two co-workers were gunned down, execution-style with silenced pistols, in a trendy Georgetown Starbucks."

Although two guns were used and no money was stolen, police pinned the slaying on habitual criminal Carl Cooper after interrogating him for 54 hours. Cooper later recanted, saying his "confession" came under duress.

Is Salvadoran illegal immigrant Guandique going to be likewise railroaded with a conviction that will finally sweep under the rug a messy "bimbo eruption" that involved congressmen, Israeli intelligence and OKC bombing participants?

Interestingly, Guandique initially passed a lie detector test in 2002 and was officially ruled out as a suspect at that time. That evidence has been ruled inadmissible in his trial. ★
